The Nicholas

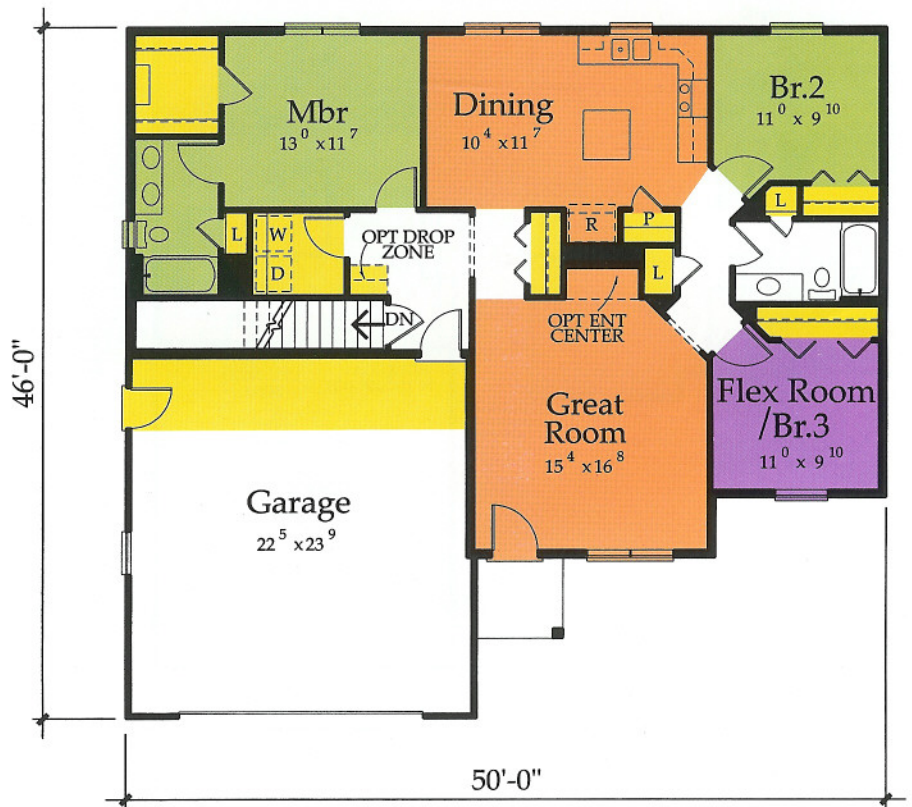

Model # N290 c

Total 1,424 Sq. Ft.

Keeping the secondary bedrooms separate from the master bedroom is a great way to control noise and allows the bedrooms to be flexed into his-and-her offices or a bedroom and den.

With separate entertaining spaces, two groups can enjoy different activities. The adults can visit in one area, while the kids play board games in another.

The stairs leading to the basement are located near the rear foyer and the garage. How convenient!

How this home lives

- Socialize
- Relax
- Organize
- Flex

*Elevations may include optional features.
